## PROJECTS

### • Recruitment System

Collaborated in a team project developing a Recruitment System using Java Swing, AWT, and JDBC for MySQL. Played a key role in designing a user-friendly interface. Successfully integrated JDBC for efficient data handling. The project showcased strong teamwork and technical prowess.

### • Image Search

Created a cool Image Search Engine project where users can easily find pictures by typing words (like "beach" or "cat"). It's like having a super-smart photo album that knows exactly what you want to see! Used skills in HTML, CSS, and JavaScript for the pretty design.
